

SPAWARINST 4440.10B  
SPAWAR 003-244  
19 August 1988

SPAWAR INSTRUCTION 4440.10B

From: Commander, Space and Naval Warfare Systems Command

Subj: SHORE AND SHIPBOARD 2Z ELECTRONIC EQUIPMENT FURNISHED TO  
UNITED STATES COAST GUARD

Ref: (a) OPNAVINST 4000.79A  
(b) NAVSUP Publication 437

Encl: (1) Specific Responsibilities

1. Purpose. To publish information about the agreements between Space and Naval Warfare Systems Command and the U.S. Coast Guard for Interservice Logistic Support as it pertains to 2Z cognizance electronic equipment. Also, to publish requisitioning procedures for supply support of the U.S. Coast Guard.
2. Cancellation. NAVELEX Instruction 4440.10A is canceled.
3. Background. The Navy and U.S. Coast Guard have agreed that the Coast Guard will install and maintain certain electronic equipments to permit ready communication when the Coast Guard and Navy are operating together during emergencies. Reference published the basic policy agreements between the Navy and the U.S. Coast Guard. Reference (b), paragraph 02131, describes requisitioning procedures for supply support after initial outfitting and before amalgamation of the Coast Guard units with the Navy in time of emergency or special operations. Specific responsibilities and procedures related to SPAWAR cognizance equipments are summarized in enclosure (1).
4. Action. Addressees will comply with enclosure (1).

JOHN C. WEAVER  
Rear Admiral, U.S. Navy

Distribution:  
SPAWAR List 3  
SNDL Part II  
FKQ (SPAWAR Activities)

## SPECIFIC RESPONSIBILITIES

### 1. Responsibilities

#### a. The U.S. Coast Guard will:

(1) Furnish data as required by SPAWAR, including population data for SPAWAR equipment in the custody of the Coast Guard.

(2) Prepare quarterly billings for reimbursable expenses. The billing should be supported by an explanation of the expenses with reference to this instruction. Coast Guard billings to SPAWAR shall not exceed the quarterly amount agreed upon.

(3) Maintain on board its vessels and aircraft, communications and search electronic equipment similar to that on comparable Navy vessels and aircraft. Deviation from similar type allowances is permitted when required by Coast Guard peacetime duties.

(4) Provide a description of the operational capabilities of Coast Guard unique equipment under development or modification which has potential military application. This exchange of information, normally coordinated through the Coast Guard's liaison officers, is required to preclude duplicated research projects within SPAWAR and the Coast Guard.

#### b. SPAWAR 003 will:

(1) Prepare the Program Objective Memorandum (POM) for the support of SPAWAR cognizant equipment maintained on Coast Guard vessels. Prior to each fiscal year the Commander, SPAWAR, and the Commandant of the Coast Guard shall agree, in writing, on the quarterly amount of financial support to be borne by SPAWAR. This shall be based on requirements provided by the Coast Guard. All materials and services shall be paid for by the Coast Guard on an individual (requisition) cash sale basis. The Coast Guard shall be reimbursed by SPAWAR quarterly. Specific services and charges to be supported by the maintenance budget include:

(a) Routine overhaul of SPAWAR equipment, including installation of identical replacement equipment.

(b) Maintenance parts and spares.

- (c) Maintenance consumables and stock funded Depot Level Repairables (DLRs).
- (d) Depot repair of SPAWAR equipment.
- (e) Casualty report CASREP (major) services required to supplement ship forces.
- (f) Calibration of peculiar support equipment (PSE).
- (g) Emergency repair or modification of PSE to ensure an adequate. readiness condition.
- (h) Coast Guard technical services and/or inspection of SPAWAR equipment.

(2) Coordinate storage and warehousing facilities, to the extent available, based on requirements provided by the Coast Guard, as agreed upon in accordance with DODINST 4145.19, Storage and Warehousing Facilities and Services.

c. SPAWAR PD and PMWs shall:

(1) With guidance provided by CNO, specify program, budget, and funding for all SPAWAR equipment, associated support material, and related services to be furnished to the Coast Guard. This includes both appropriation purchase account (APA) and Navy stock account (NSA) material, as well as operating funds to provide maintenance support for NSA material.

(2) Provide to the Coast Guard SPAWAR military readiness equipment (i.e, 2Z and 6Y cognizance material) and associated support materials. All such equipment and material shall be considered as Navy equipment.

(3) Program managers shall submit program support data (PSD), complying with SPAWARINST 4420.1A, and including all Coast Guard requirements for specific equipment. These PSDs shall be used for the development of SPAWAR budgets for Coast Guard interim, initial, and follow-on outfittings.

(4) Provide initial issues to support Navy imposed requirements at no cost to the Coast Guard. This includes new construction and new equipment for existing aircraft, vessels and shore activities, as well as related repair parts, field changes, test equipment peculiar to the basic equipment, special tools, accessories, and other necessary support materials. SPAWAR shall provide operating funds to reimburse for Navy stock account material.

Enclosure (1)

19 August 1988

(5) Assure the form, fit, and function of furnished equipment. PD/PMWs and Coast Guard shall jointly determine space, interface, and systems engineering requirements pertinent to Coast Guard equipment. Installation costs of initial issue equipment and associated material is the Coast Guard's responsibility

(6) Keep the Coast Guard advised of the best estimated delivery date for SPAWAR provided equipment and materials. SPAWAR shall make every effort to deliver equipment by the required delivery date. The Coast Guard will give SPAWAR the delivery location and required delivery date of equipment and associated material.

(7) Provide, in the period after initial outfitting and prior to integration of the Coast Guard units into the Navy, the following equipment, material and services to the Coast Guard at no cost to the Coast Guard. Cost shall be the PD/PMWs responsibility and will be financed by direct expenditure to Navy appropriations.

(a) Scheduled replacements for mission improvement of SPAWAR equipment, including spare parts outfitting, test equipment, and any necessary engineering or design work to ensure interface with existing Navy and/or Coast Guard equipment.

(b) Repair or replacement of defective SPAWAR equipment provided as initial issues.

(c) Appropriation purchase account material required to accomplish SPAWAR authorized modifications to SPAWAR equipment.

(d) Other appropriations purchase account material used in maintenance support of SPAWAR equipment.

(e) Participation in the SPAWAR field change installation project (FCIP) and other similar technical assistance/service programs developed by the U.S. Navy.

(8) Provide, in the period leading to and during integration of specific Coast Guard units within the Navy, at no cost to the Coast Guard, all necessary maintenance support material and services for installed SPAWAR cognizance equipment. This does not include equipment spares and repair parts unique to the Coast Guard.

(9) Furnish, at no cost, technical and tactical publications and information necessary for the efficient operation, maintenance, and employment of all SPAWAR in the Coast Guard's possession.

Enclosure (1)

19 August 1988

(10) Perform necessary logistics support functions, including, but not limited to provisioning, war reserve requirements determination, Industrial Preparedness Planning (IPP) as per OPNAVINST 4800.13 and preparation of allowance parts lists (APLs) for Navy-owned SPAWAR cognizant equipment in the Coast Guard's possession.

(11) Take all actions necessary to support the Coast Guard to the extent that material support budgets are approved and funds are provided by higher authority. The availability or priority of repair services or release of materials to the Coast Guard shall be determined by SPAWAR on the same basis as support furnished to Navy units with comparable priority designators. The Commandant of the Coast Guard shall assign the force activity designators to Coast Guard units using guidance furnished by the Secretary of Defense. The provisions of DODINST 4410.6, Uniform Material Movement and Issue Priority System apply.

(12) Maintain a list of SPAWAR material aboard Coast Guard aircraft, vessels, and shore activities. These lists are to be provided to the Aviation Supply Office (ASO), Philadelphia, Pennsylvania, and the Ships Parts Control Center (SPCC), Mechanicsburg, Pennsylvania.

d. SPAWAR 11 shall:

(1) Prepare monthly billings for reimbursable material, identified to a national stock number, furnished to the Coast Guard under this instruction. Billings shall be at standard prices or the net price for DLRs. Billing shall be on NAVCOMPT form 2277 or standard form 1080 and supported by other data pertinent to the sale or creditable return. Billing shall be submitted to the Coast Guard payment office indicated in the requisition document.

(2) Accept summarized quarterly billings by the Coast Guard without detailed supporting schedules of the reimbursable transactions incorporated in each billing.

2. General Provisions:

a. To satisfy Coast Guard non-military requirements, the Coast Guard may submit a military standard requisition issue procedure (MILSTRIP) requisition or a military interdepartmental purchase request (MIPR) to SPAWAR for equipment, supplies and services for inclusion on SPAWAR contracts or procurements. SPAWAR may also submit MIPRs to the Coast Guard for inclusion of Navy equipment, supplies and services requirements on Coast Guard contracts or procurements.

Enclosure (1)

19 August 1988

b. When developing and manufacturing Coast Guard equipment the Coast Guard may use SPAWAR's laboratories, testing, repair and microfilm facilities when such facilities are not available within the Coast Guard. Contract administration services -available to SPAWAR may be used in administering Coast Guard contracts. The Coast Guard shall reimburse SPAWAR for these costs. SPAWAR shall also be reimbursed for services such as provisioning, coordinated shipboard allowance list (COSAL) and APL products, etc., provided to the Coast Guard by ASO/SPCC for Coast Guard equipment.

c. Overhaul of Navy-owned 2Z cognizance equipment in the possession of the Coast Guard shall be done by the Navy, on a non-reimbursable basis, whenever the Coast Guard does not have facilities for performing such work. Commandant (G-TES) is responsible for identifying to SPAWAR overhaul requirements in a mutually agreeable timeframe.

d. The Coast Guard may return defective repairables (SPAWAR or SPAWAR-type Coast Guard-owned) to the Navy's designated overhaul point using the Navy master repairable item list (MRIL) and reference (b). Credit shall be allowed the Coast Guard for returned repairable assemblies on the same basis as Navy activities.

e. Nothing in this instruction shall prevent the Coast Guard from procuring equipment from sources other than the Navy.

Enclosure (1)
